OBSERVATION OF COLORS

During the summer months at sunset each day the Plymouth Yacht Club conducts the lowering of our American Flag. The launch operators will lower the Yacht Club Burgee and other flags first They will notify the upper bar via phone. But, in any case they will shout "Attention to Colors" and shoot the cannon. Subsequently the American Flag will be lowered slowly. It's during this process that I respectfully ask that all members on the property stand and observe in silence. As a point of reference this activity takes place at the majority of Yacht Clubs in the US as well as military bases around the world.

Also if you call for Launch Service around sunset, there will be an additional wait since this process takes the coordination of both operators on duty. Thank you for your patience and participation in this very important activity.

Jack May
Commodore
